

WISCORE

User Guide BMECat 2005 for the creation of electronic Catalogs for E.ON Corporation

Version 1.2 (Updated 19.04.2010)

This document describes the generation and usage guidelines for catalog data formatted in BMECat 2005 for the eProcurement platform accessible on the E.ON intranet. This document is not meant to replace the BMECat 2005 specifications, but adds additional requirements. Further, it declares several former OPTIONAL elements as REQUIRED fields, if those are needed in the ordering process of the ERP system. In addition to the requirements in this documentation, all catalog data has to be valid under the specifications of the BMECat 2005 standard and its DTDs and the W3C Recommendation for XML data. Thus, only a subset of the fields described in BMECat are covered here.

A given product catalog is valid for utilization in E.ONs E-Procurement catalog if it adheres to the specifications listed here in addition to the required fields described in the BMECat 2005 specification. Any further data elements not mentioned here are not recognized by the catalog-software and are therefore not available in order transactions via this application.

This description refers to the BMECat transaction T_NEW_CATALOG, but also applies analogously to other BMECat transactions. Any new catalogs and updates to existing catalogs for use with E.ON should only use the transactions described in BMECat.

Parts of this document are based on the BMECat standard 2005, copyright 1998-2001, Fraunhofer IAO and the University of Essen BLI.

Errors in the Standards BMECat and eClass (for example insufficient category attributes) lie in the responsibility of the committees for BMECat and eClass. For further development of these standards, we would ask you to send us copies of any notes of such errors.

WISCORE

1 Online-Validation

You can validate your catalog data using our online-validation (<http://www.wiscore.de/eon>). Please confirm that your catalogs are valid before you send them to us.

2 Naming Conventions

Please use the following naming convention when sending catalog-files:
<supplier-name>_<yyyymmdd>.xml

Example: *wisconsult_20010723.xml*

If you send us zip-compressed catalog data, please make sure the archive has the same name as the included file and has the proper ending (i. E. "zip").

In case you send us more than one catalog file on the same day, make sure you number them consecutively:
<supplier-name>_<yyyymmdd>-<nr>.<file-type>

Example: *wisconsult_20010808-2.xml / wisconsult_20010808-2.zip*

Please use only alphanumeric characters, underscores or hyphen for the file name. Do not use any umlauts or non-alphanumeric characters (including space).

3 Usage of Fileheader for Catalog-Data

According to BMECat and W3C Recommendation

```
<?xml version="1.0" encoding="UTF-8"?>
```

```
<!DOCTYPE BMECAT SYSTEM "bmecat_2005_tnc.dtd">
```

```
<BMECAT version="2005" xmlns="http://www.bmecat.org/bmecat/2005fd">
```

4 Usage of path names/directories in Mime_Root and Mime_Source

In Addition to the remarks for MIME_ROOT and MIME_SOURCE elements, please use a reasonable directory structure for the different mime objects.

Example:

```
<MIME_ROOT>supplierxy/mimes/</MIME_ROOT>
```

Please use this structure when sending us volumes with the corresponding mime-objects, for Example:

```
supplierXY/mimes/pictures/normal/manufacturer1/all „normal“ pictures of manufacturer1.jpg
```

...

```
supplierXY/mimes/pictures/normal/manufacturerN/all „normal“ pictures of manufacturerN.jpg
```

```
supplierXY/mimes/pictures/thumbnail/manufacturer1/all „thumbnail“ pictures of manufacturer1.jpg
```

For questions and comments, refer to:

Thomas Wahle

Mail: eon-kataloge@wiscore.de

Tel: +49 (0) 234 7092 – 0

...
supplierXY/mimes/pictures/thumbnail/manufacturerN/all „thumbnail“ pictures of manufacturerN.jpg

supplierXY/mimes/factsheets/manufacturer1/all factsheets of manufacturer1.pdf

...
supplierXY/mimes/factsheets/manufacturerN/all factsheets of manufacturerN.pdf

Use those paths in your catalog data accordingly:

<MIME_SOURCE>pictures/normal/manufacturer1/sample_picture_of_manufacturer1.jpg</MIME_SOURCE>

and

<MIME_SOURCE>factsheet/manufacturer1/sample_factsheet_of_manufacturer1.pdf</MIME_SOURCE>

respectively.

Please note that all path names are case-sensitive. Use the same upper and lower case in your volumes as the catalog data to ensure proper display of all mime objects.

5 Transition from BMECat 1.2 to BMECat 2005

The elements described in this Document define the usage of the new elements included in BMECat 2005. With a few exceptions, the elements used in BMECat 1.2 are still valid, though deprecated. We recommend you to use the new elements if possible, coming updates to BMEcat will not include the old elements. In general, the changes include the transition from ARTICLE_...-elements to PRODUCT_...-elements, but there are a few other optional changes. Chapter 6 describes the new usage, specific changes from BMECat 1.2 to BMECat 2005 are labeled accordingly.

Please take note of those changes in particular

6 Usage of BMECat 2005 / eClass 5.1

Element	Usage
HEADER / CATALOG	
	Any XML-File must have a reference to the used encoding (UNICODE UTF-8) and it's referenced DTD. Please use the standard BMECat 2005 DTDs only.
LANGUAGE	According to BMECat, („DEU“, „CZE“, „HUN“, „DUT“)
CATALOG_ID 	According to BMECat; never change the initial ID without prior consultation. Do not use any special characters, spaces or umlauts for the Catalog_ID.
CATALOG_VERSION 	According to BMECat: for a new catalog, use a new version number and always assign it in ascending order. Do not use any special characters, spaces or umlauts for the Catalog_Version.
CATALOG_NAME	According to BMECat but required; never change the initial name without prior consultation
TERRITORY	According to BMECat, („DE“, „CZ“, „HU“, „IT“, „NL“)
CURRENCY	According to BMECat, („EUR“, „CZK“, „HUF“)
MIME_ROOT 	<p>According to BMECat; use relative paths only, according to the mime objects on the volume (no paths like: „\\myServer/pictures..“ or „http://someserver.com/pictures..“). If the picture “article4711.jpg” has the path “supplierXY/mimes/” on your CD, choose “supplierXY/mimes” for MIME_ROOT and “article4711.jpg” for MIME_SOURCE.</p> <p>Alternatively, leave MIME_ROOT empty and specify the complete path for every article, in that case “supplierXY/mimes/article4711.jpg”.</p> <p>Always use the same upper and lower case in MIME_ROOT and MIME_SOURCE according to the path names on your volume. Do not use double backslashes and do not use http-URLs or absolute paths.</p> <p>Do not alter a chosen path/directory for the mime objects without consultation. Change the names of mime objects only after consultation to avoid redundancy.</p>
HEADER / BUYER	
BUYER_NAME	Fill this field with „E.ON AG“
HEADER / AGREEMENT	
AGREEMENT_ID 	Fill this Field with the E.ON Agreement ID (request your ID if unknown). Do not change this value.
AGREEMENT_START_DATE 	According to BMECat. The previous DATETIME-element is deprecated, please use the new AGREEMENT_START_DATE element instead.

For questions and comments, refer to:
 Thomas Wahle
 Mail: eon-kataloge@wiscore.de
 Tel: +49 (0) 234 7092 – 0

AGREEMENT_END_DATE  BMECat 2005	According to BMECat, analogous to previous element
HEADER / SUPPLIER  BMECat 2005	Please use the integrated SUPPLIER-elements for defining the Supplier. The new element group PARTIES is currently not supported
SUPPLIER_ID 	Different from BMECat, this field is MANDATORY. Fill with type="duns". The corresponding Dun & Bradstreet-Number is available on request.
SUPPLIER_NAME 	According to BMECat; do not change this value without prior consultation. When first determining the supplier_name, please note that the supplier name is part of the article overview. You do not have to fill in the complete company name. Choose a short name, for example Wiscore rather than ThyssenKrupp Wiscore GmbH.
ADDRESS / CONTACT	Different from BMECat, this field is MANDATORY and has to contain the suppliers contact person. Fill with "First name Surname" without comma.
ADDRESS / PHONE	Fill this field with the phone number of the contact person.
ADDRESS / EMAIL	Fill this field with the mail address of the contact person. Do not use mailto: .
T_NEW_CATALOG	
TNC / CLASSIFICATION_SYSTEM	Not applicable, the eClass 5.1 classification system is used.
TNC / CATALOGGROUP_SYSTEM	Not applicable, the eClass 5.1 catalog structure is used.
TNC / PRODUCT	Mode „new“, „update“ or „delete“ according to TRANSACTION, here: description for "new" and T_NEW_CATALOG only.
SUPPLIER_PID  BMECat 2005	According to BMECat; orders in the catalog software refer to the supplierPID, choose a unique ID for every article. Part numbers for article variants (VARIANTS) are not supported, please do not use article variants. Due to subsequent systems, this field should not exceed 22 characters. Do not use any special characters or umlauts for the SupplierPID. Please note: Through an Interface between E.ON and cc-chemplorer, catalog data can be exchanged (only usable for E.ON organisations). The maximum field length for the SUPPLIER_PID is 18 characters. Please refer to your E.ON Lead Buyer, whether your catalog data is also used via cc-chemplorer, and keep this limitation in mind.

TNC / PRODUCT / PRODUCT_DETAILS	
DESCRIPTION_SHORT 	According to BMECat; the field length should not exceed 200 characters, the description should sufficiently describe the article (i.e. color, dimensions etc. should be included).
DESCRIPTION_LONG	According to BMECat; all relevant product information should be included (including the information from FNAME/FVALUE Tags). Articles with differing order units and content units, which are not specified through ORDER_UNIT, CONTENT_UNIT and NO_CU_PER_OU should be mentioned in the long description (e.g. 1 packet copying paper, 500 sheets per packet). The first 1500 characters are included in the search, please put important information at the beginning of the description.
INTERNATIONAL_PID type=ean / EAN  <small>BMECat 2005</small>	According to BMECat; The new definition INTERNATIONAL_PID will be used in future versions, EAN is deprecated, please use the new definition instead.
BUYER_PID type= 	If known, fill with appropriate Central SAP Material Code for E.ON Energy or E.ON Ruhrgas. Fill attribute "type" with the valid values defined in Chapter 7
MANUFACTURER_PID  <small>BMECat 2005</small>	EXPECTED field, fill with appropriate manufacturer PID if possible. Due to subsequent systems, this value should not exceed 40 characters.
MANUFACTURER_NAME	EXPECTED field, fill with manufacturer name if appropriate. Due to subsequent systems, this value should not exceed 10 characters..
DELIVERY_TIME  <small>BMECat 2005</small>	EXPECTED field, due to subsequent systems, this value should not exceed 5 digits. This element is deprecated. Please use the new element LEADTIME in PRODUCT_LOGISTIC_DETAILS/DELIVERY_TIMES
SPECIAL_TREATMENT_CLASS 	According to BMECat, identifies article as dangerous substance. Fill „type“-attribute with ADR, GGVS or GGVE as specified for dangerous substances. Every article with a non-empty field will be marked as dangerous substance in the application. In that case you must attach at least the “EU material safety data sheet” and if available the “Standard operating instructions” as MIME. Use „data_sheet“ as MIME_PURPOSE In compliance with to the Ordinance on Hazardous Substances, an up-to-date safety data sheet according to the preparation guide line must be attached (MIME). The operating instruction attachment (MIME) can be provided as a sample, derived from the instructions made up by the supplier/manufacturer for its own personnel for handling the product.
KEYWORD	OPTIONAL field, please fill with descriptive Keywords for the article. These can be provided either by E.ON or the supplier (for example: mobile or handy for cell phone).

REMARKS	Only internally used by E.ON Czech and Slovakia. Please do not fill in any values.
SEGMENT	According to BMECat Should be filled with "SERVICE" to indicate that the item is part of the segment "Services" – otherwise please don't use or left blank
PRODUCT_STATUS type="core_product" 	According to BMECat; products in stock can be labeled as such by using <PRODUCT_STATUS type="core_product">1</PRODUCT_STATUS> (user can sort or search this field). Other PRODUCT_STATUS are currently not supported.
TNC / PRODUCT / PRODUCT_FEATURES	
REFERENCE_FEATURE_SYSTEM_NAME	MANDATORY, fill with "ECLASS-5.1"
REFERENCE_FEATURE_GROUP_ID 	MANDATORY, this field is to be filled with the associated eClass category-ID. Please note: the id should be provided without dashes, i.e. use "24110301" instead of "24-11-03-01". Additionally, do not use eClass-codes ending with "00".
TNC / PRODUCT / PRODUCT_FEATURES / FEATURE	
FNAME 	According to eClass 5.1 Features Please note: You have to provide the primary key (IDMM) of the given feature (e.g. AAA678001 for feature "Number of heating stages). The notation is CASE-SENSITIVE. According to the DTD for BMECat, you have to provide at least one feature (FNAME/FVALUE-pair) when using the OPTIONAL element FEATURE (changed since BMECat 1.01).
FVALUE 	According to eClass 5.1; use either a value for this feature FNAME (e.g. 3 for the number of heating stages) or a primary key (IDWE, e.g. AAA133001 for 11mm) from the eClass-Attribute-Value-Table. If a value is given, it uses either the associated unit or no unit (as in number of heating stages). The notation is CASE-SENSITIVE!
FUNIT 	If no unit is provided, the default unit for this eClass-feature is used. In addition to the units allowed by eClass, you can use the additional units according to appendix 5.3 (but only in the exact notation as provided).
TNC / PRODUCT / PRODUCT_ORDER_DETAILS	
ORDER_UNIT 	According to BMECat Please note: To ensure automatic processing of the catalog, use only allowed ISO-codes according to the appendix.
CONTENT_UNIT 	According to BMECat but REQUIRED if NO_CU_PER_OU is used. Please note: To ensure automatic processing of the catalog, use only allowed ISO-codes according to the appendix.
NO_CU_PER_OU	According to BMECat but REQUIRED if CONTENT_UNIT is used.

PRICE_QUANTITY 	According to BMECat. This field specifies the amount of order units, for which the price is defined. Its purpose is not to specify the minimum order quantity or the amount of content units in a order unit.
QUANTITY_MIN 	According to BMECat Please note: This value controls the minimum amount a catalog-user can order of this item. It is checked before the shopping cart is submitted.
QUANTITY_INTERVAL 	According to BMECat Please note: This value is displayed to the catalog user. It is not guaranteed that orders are placed that differ from this value.
TNC / PRODUCT / PRODUCT_PRICE_DETAILS	
VALID_START_DATE  <small>BMECat 2005</small>	According to BMECat. The previous definition as DATETIME is deprecated, please use the new element VALID_START_DATE instead.
VALID_END_DATE  <small>BMECat 2005</small>	According to BMECat. Analogous to prevois element.
TNC / PRODUCT / PRODUCT_PRICE_DETAILS / PRODUCT_PRICE	Only use price_type="net_customer"
PRICE_AMOUNT	According to BMECat Please note: Period is decimal separator. Always use at least two decimal digits (5.00 instead of 5).
PRICE_CURRENCY	According to BMECat Please note: Prices must be specified in Euro.
TAX	MANDATORY-Field. TAX must be filled correctly to ensure processing in following systems. Please note: Period is decimal separator instead of comma, "0.16" corresponds to 16 of hundred.
LOWER_BOUND	According to BMECat
TNC / PRODUCT / PRODUCT_LOGISTIC_DETAILS	
LEADTIME  <small>BMECat 2005</small>	EXPECTED field, due to subsequent systems, this value should not exceed 5 digits. Use this element instead of the former DELIVERY_TIME element.
TNC / PRODUCT / MIME_INFO / MIME	
MIME_TYP	According to BMECat but required if MIME_SOURCE is used.
MIME_SOURCE	According to BMECat; all filenames in lower case – identical notation required for MIME_ROOT / MIME_SOURCE and file names.
MIME_DESCR 	According to BMECat; This text will be displayed to the catalog user as label for the linked file. Please use a meaningful description.

<p>MIME_PURPOSE</p>  	<p>According to BMECat but required if MIME_SOURCE is used.</p> <p>The standard picture must be of the type “normal”. Any article can only have one MIME with MIME_PURPOSE=“normal”. Every article should have a standard picture.</p> <p>If no picture with purpose “normal” is defined for an article, no picture will be displayed in the detail view.</p> <p>Format restrictions: JPEG with 24 bit colour depth, resolution 72 dpi, default size: 280*350 pixels.</p> <p>(The size of additional pictures and documents should stay in a reasonable scope – please don’t include very big PDFs or high resolution images)</p>
<p>TNC / PRODUCT / PRODUCT_REFERENCE</p>	<p>According to BMECat</p>
<p>PROD_ID_TO</p> 	<p>According to BMECat</p>
<p>CATALOG_ID</p>	<p>According to BMECat; only references to articles within this catalog and version are allowed.</p>
<p>CATALOG_VERSION</p>	<p>According to BMECat; only references to articles within this catalog and version are allowed.</p>
<p>TNC / PRODUCT_TO_CATALOGGROUP_MAP</p>	<p>Not used, cp. PRODUCT_FEATURES / REFERENCE_FEATURE_SYSTEM_NAME and REFERENCE_FEATURE_GROUP_IP</p>

Alternative units of measurement in FUNIT

Due to sometimes inappropriate units of measurement, which are specified in eClass-Features (e.g. width of adhesive tape in metres, no support for inch for instruments, diameter in metres for drills) these alternative units are supported in FUNIT-elements..

Please follow the correct notation as stated here.

EClass	Alternative	Description	eClass	Alternative	Description
1/s	1/h	Times per hour	m ²	cm ²	Square centimetre
	1/min	Times per minute		mm ²	Square millimetre
	UpM	Rounds per minute
